VISION

A leading Catholic university that inspires excellence and drives innovation toward a just, peaceful, and sustainable society.

MISSION

To champion the Human and Christian Education of lifelong learners who value history and culture through responsive and inclusive academic, research, and extension programs.

DESCRIPTION:

This course focuses on the understanding of different types of technologies available in the IT market today, and the innovative and creative integration of these technologies to form customized solutions to empower businesses and organizations. There is much emphasis on creative problem-solving using IT and its skillful implementation.

Looks at systems integration with focus on communication mechanisms and data standardization. Students learn how to represent structure and how to transport data using XML and XML related technologies and protocols. Standardization of XML documents for the purpose of data exchange is stressed.

The course will also provide students with the opportunity to learn the fundamental to advance skills that are required in Professional Software Development using the latest Visual Studio .NET particularly C# .NET environment. It also covers graphical object-oriented programming applications and various C# .NET tools and techniques that will be used for developing systems which includes database programming. This class shall be delivered in both online and offline/module-based approach. This course is also compliant with Outcomes-Based Education (OBE) and 21st Century Learning Design (21CLD) frameworks.

COURSE LEARNING OUTCOMES:

By the end of this course, students can:

CLO 1. Understanding of the impact and practical applications of software technology in everyday life.
CLO 2. Demonstrate confidence and proficiency in developing and managing system applications;
CLO 3. Understanding of software development concepts through the analysis of client-based case studies.
CLO 4. Implement Object-Oriented Programming (OOP) principles effectively.
CLO 5. Develop a functional Software Application.
CLO 6. Demonstrate 21stcentury skills in all learning activities.

LEARNING PLAN:

Course Learning Outcome	Topic Learning Outcome
CLO1. Discuss the impact and real-world use of Software application technology in daily life.	TLO1. Discuss the latest software applications technology and its impact on the way raw data is processed and presented. TLO2. Demonstrate and apply application software using Visual Studio community edition.
CLO2. Having confidence in knowing and developing systems applications.	TLO3. Make professional systems application designs using windows forms application and apply different forms component and perform different property procedures. TLO4. Learn to use front-end and its application using C# programming language as platform code.
CLO3. Understand Software Development concept by dealing client-based case study.	TLO5. Discuss how to deal with client-based Software application. TLO6. Demonstrate actual client-based by integrating UI/UX experience modules.
CLO4. Implement Object Oriented way of programming.	TLO7. Design and create front-end windows forms application with OOP technique. TLO8. Implement back-end design with systems integration.
CLO5. Develop and deploy complete Software Application for pilot testing.	TLO9. System Deployment.

COURSE POLICIES AND REQUIREMENTS:

1. This course follows the Onsite Learning Mode. All activities will be done in the laboratory, classroom and field.

2. Enrollment in an E-Class. The Center for Innovative Learning Programs (CILP) shall enroll you in the e-class. This will be based on the class list provided by the Office of the University Registrar.

3. Laboratory Policies
    a. Students must be honest at all times; cheating and plagiarism in any form will merit a grade of 0.00.
    b. Cellular/Mobile phones should always be in silent mode during class hours; the use of cellular phones is prohibited in class unless special permission is sought. Cellular phones also cannot be used as calculators during examinations.
    d. Any complaints against the teacher or against classmates should be properly addressed to the subject teacher for appropriate action. Students may seek the help and guidance of their academic/registration adviser in resolving the issue with the subject teacher when such mediation is needed.

4. Communication and Feedback
    a. Online Asynchronous Communication shall happen when the faculty utilizes at least one of the recommended asynchronous communications. The minimum response

time for asynchronous communication is 48 hours, excluding Sundays and holidays. All communication platforms must be explicitly indicated in the syllabus. Below are the recommended asynchronous communication platforms:

i. Forum – at the Forum Tab at Schoolbook, students can post their general concerns. The forum is public, and any post can be seen by the class.
ii. Messaging – at Schoolbook. Any private or confidential matters may be messaged through the Schoolbook messaging feature.
iii. Email – you may email your professor. (Professor's email will be given during the course orientation)

b. No use of foul, curse, and other bad words, whether written or verbal. No shouting. No flooding of chat and messages. No selling.

5. Attendance Policy
   a. Attendance Policy for Onsite Classes is scheduled based on the learning plan.
   b. The onsite meeting will only be held at the schedule indicated in the registration form.
   c. Students are required to attend onsite classes, 40% of absence (from onsite classes) for the entire semester means 0.0 final grade.

6. Intellectual Property Policy
   a. Policy and copyright infringement will not be tolerated. Any violation of such will earn students a grade of zero in the assessment.
   b. Using any illegally obtained software is strictly prohibited.
   c. Students are encouraged to use their original photos, videos, and other resources. Otherwise, students can use royalty-free resources or embed the sources in their submissions to avoid copyright infringement and/or plagiarism.
   d. Giving of passwords to Schoolbook and Office 365 is strictly prohibited. Likewise, accessing Schoolbook and Office 365 accounts other than the students' personal account is also strictly prohibited. Violating students will be reported to the Student Welfare and Formation Office (SWAFO).

7. Other Policies
   a. Attire - students must wear decent casual or smart-casual attire prescribed by the Student Handbook.
