VISION

A leading Catholic university that inspires excellence and drives innovation toward a just, peaceful, and sustainable society.

MISSION

To champion the Human and Christian Education of lifelong learners who value history and culture through responsive and inclusive academic, research, and extension programs.

COURSE DESCRIPTION:

This course covers the integration of confidentiality, integrity and availability into an organization's security program through the use of physical and logical security controls. Topics include data protection, telecommunications systems, application and emerging technologies. Moreover, this course will introduce you to enterprise systems and show how organizations use enterprise systems to run their operations more efficiently and effectively. The course will inspect typical Enterprise Systems modules: materials management (MM), sales and delivery, and financial accounting. Real-time enterprise system will be utilized to integrate business transactions along and between processes, leading to benefits such as efficient and error-free workflows plus accounting, management reporting and improved decision-making.

By using exercises at the end of each module, students can put their knowledge into practice and gain a sustainable understanding of the underlying processes.

COURSE LEARNING OUTCOMES:

By the end of this course, students can:

CLO1. understand the use of Enterprise software, and its role in integrating business functions
CLO2. explain the scope of common Enterprise Systems (e.g., MM, SCM, CRM, HRM, procurement);
CLO3. understand and gain insight into process views of organizations and tools and techniques used to model both as-is and to-be models;
CLO4. apply key technical terminology in enterprise information systems as they apply in different ERP products and development methods;
CLO5. use one of the popular ERP packages to support business operations and decision-making;
CLO6. examine the basic issues in Enterprise Systems; and
CLO7. create master records to be used in different modules of the Enterprise system including sales and deliver, materials management and finance.
CLO8. demonstrate 21st century skills in all learning activities.
