CHECKLIST OF COMPLIANCE WITH THE SYLLABUS PARTS AND FORMAT

Course Code and Title**: S-CSSE412LA SOFTWARE ENGINEERING 2 LABORATORY**

This undertaking has a two-fold objective. First, it allows the syllabus designers to review their output systematically. Based on their honest evaluation, they could make the necessary revision. Second, it expedites the checking to be done by the Dept. Syllabus Committee Reviewer, Department Chair, the College Dean, and the Institutional Syllabus Reviewers.

DIRECTIONS: Review the latest version of the syllabus that you submitted to the Department Chair for his/her scrutiny. As you do your reflective review, assess your compliance with the syllabus parts and format by answering each of the items that follow. Shade the corresponding box (complied with, not complied with) under the compliance column.

Format, parts, and description	Compliance	
	Complied With	**Not Complied With**
Format		
1. The 2023-2024 syllabus format is used.	/	
2. The font used in the syllabus preparation is Times New Roman (11).	/	
3. DLSUD (being first) and college logos are beside each other at the top (center).	/	
4. Preliminaries include all the contact details of the professor, such as the day and time.	/	
5. Each WEEK has a corresponding date.	/	
Content		
6. The Learning Outcomes have more HOTS than LOTS.	/	
7. CLOs and TLOs are identified for each module/lesson/topic.	/	
8. Gospel reading and Reflection precede the presentation of each topic under the teaching-learning activities.	/	
9. The journal articles/references are within the last five years.	/	
10. Some materials are beyond the five-year rule because these are considered cannon and seminal studies.	/	
11. The course policies and requirements section of the syllabus is a clear provision for addressing the concerns and grievances of students.	/	
Assessments		
12. At least three and a maximum of five Enabling Assessments per term are reflected in the syllabus.	/	
13. Formative Assessments are not reflected anymore in the syllabus.	/	
14. Enabling Assessments are briefly described and aligned with the learning outcomes and teaching-learning activities.	/	
15. The syllabus presents one-module(lesson)-one-assessment correspondence.	/	
16. Only one Enabling Assessment is reflected in a given week	/	

17. The Enabling Assessments are aligned with the identified CLOs and TLOs.	/	
18. Enabling Assessments, Class Participation, and Summative Assessments constitute the breakdown of grades per term.	/	
19. Thirty percent (30%) is allotted for Summative Assessments per term.	/	
20. Twenty percent (20%) is allotted for Class Participation/Attendance per term.	/	
21. The percentage that is allocated for Enabling Assessments fairly corresponds to their quantity, depth, breadth, and level of difficulty compared to the other components of the Midterm Grade and Final Grade.	/	
22. Summative Assessments are aligned with the identified CLOs, TLOs and teaching-learning activities.	/	
23. Enabling Assessments are aligned with the identified CLOs and TLOs and teaching-learning activities.	/	
24. The Midterm Summative Assessment measures appropriately and validly with the identified CLOs and TLOs for the entire MIDTERM PERIOD	/	
25. The Final Summative Assessment measures appropriately and validly with the identified CLOs and TLOs for the entire FINAL PERIOD.	/	
References and Curriculum Map		
26. The References must be within the last 5 years except for canons and seminal studies.	/	
27. It must be a combination of books, eBooks, journal articles, videos, etc.	/	
28. It should follow the APA 7th edition for CLAC, CBAA, CTHM, CCJE, CEAT, COED, and CSE for CSCS.	/	
29. The syllabus is submitted with an attached mapping table (CLOs with PLOs and ILOs)	/	

NOTE: Enabling Assessments include Discussion Type (cf. SB), Forum, Analysis Paper, Reports, etc.

COURSE SYLLABUS

COURSE CODE	**:**	S-CSSE412LA
COURSE TITLE	**:**	Software Engineering 2
COURSE TYPE	**:**	Laboratory
COURSE CREDIT	**:**	1 Unit
PRE-REQUISITES	**:**	S-CSSE321LC
CO-REQUISITES	**:**	None
MODALITY	**:**	Traditional Blended Learning
PROFESSOR	**:**	SHERYL D. KAMANTIGUE
CONTACT DETAILS	**:**	sdkamantigue@dlsud.edu.ph / MS Teams / SB – M-F, 8-5PM

COURSE DESCRIPTION:

This course focuses on the examination, identification and use of designs patterns in the developments of software systems. It also focuses on the understanding of the UML process through UML extension mechanism, object constraint language, and model checking.

The course will have a special provision on modality, pacing, pedagogy, assessment type, communication and feedback based on the national, regional, provincial, city, and institutional guidelines for the safety amidst disaster and pandemic. Hence, this class shall be delivered in both online and offline/module-based approach. This course is also compliant with Outcomes-Based Education (OBE) and 21st Century Learning Design (21CLD) frameworks.

COURSE LEARNING OUTCOMES:

By the end of this course, students can:

CLO 1. evaluate software requirements and appraise the processes involved in discovering and documenting these requirements;
CLO 2. examine different system models that may be developed as part of requirements engineering and system design processes;
CLO 3. analyze the concepts of software architecture and architectural design;
CLO 4. evaluate object-oriented software design using the UML and highlight important implementation concerns;
CLO 5. identify software testing and software testing processes;
CLO 6. explain why software evolution is such an important part of software engineering and to describe the challenges of maintaining a large base of software systems, developed over many years;
CLO 7. discuss software project management and two important management activities, namely, risk management and people management; and
CLO 8. demonstrate 21st century skills in all learning activities.

LEARNING PLAN:

Learning Outcomes for Midterm Period

Course Learning Outcomes	Topic Learning Outcomes
CLO 1. Evaluate software requirements and appraise the processes involved in discovering and documenting these requirements.	• TLO 1. Evaluate the concepts of user and system requirements and why these requirements should be written in different ways. • TLO 2. Value the differences between functional and nonfunctional software requirements. • TLO 3. Appraise the main requirements engineering activities of elicitation, analysis, and validation, and the relationships between these activities. • TLO 4. Weigh why requirements management is necessary and how it supports other requirements engineering activities.
CLO 2. Examine different system models that may be developed as part of requirements engineering and system design processes.	• TLO 5. Relate how graphical models can be used to represent software systems and why several types of models are needed to fully represent a system. • TLO 6. Analyze the fundamental system modeling perspectives of context, interaction, structure, and behavior. • TLO 7. Distinguish the principal diagram types in the Unified Modeling Language (UML) and how these diagrams may be used in system modeling. • TLO 8. Relate to model-driven engineering, where an executable system is automatically generated from structural and behavioral models.
CLO 3. Analyze the concepts of software architecture and architectural design.	• TLO 9. Distinguish why the architectural design of software is important. • TLO 10. Examine the decisions that must be made about the software architecture during the architectural design process. • TLO 11. Relate to the idea of Architectural patterns, welltried ways of organizing software architectures that can be reused in system designs. • TLO 12. Distinguish how Application-Specific Architectural patterns may be used in transaction processing and language processing systems.
CLO 4. Evaluate object-oriented software design using the UML and highlight important implementation concerns.	• TLO 13. Appraise the most important activities in a general, object-oriented design process. • TLO 14. Select some of the different models that may be used to document an object-oriented design. • TLO 15. Support the idea of design patterns and how these are a way of reusing design knowledge and experience. • TLO 16. Weigh key issues that must be considered when implementing software, including software reuse and open-source development.

CLO 8. Demonstrate 21st century skills in all learning activities.	• *Collaboration, Skilled Communication, Knowledge Construction, Self-Regulation, Real-World ProblemSolving, Use of ICT (not part of topic, but integrated in assessments)*

Module No and Learning Outcome(s)	**Date**	**Teaching-Learning Activities / Assessment Strategies** **Online Module Activities**	**Technology Enabler**	**Onsite**	**Summative Assessment**	**Allotted Hours**

			TOTAL	***24***	***3***	***27.0***

Learning Outcomes for Final Period

Course Learning Outcomes	Topic Learning Outcomes
CLO 5. Identify software testing and software testing processes.	• TLO 17. Understand the stages of testing from testing during development to acceptance testing by system customers. • TLO 18. Identify techniques that help us choose test cases that are geared to discovering program defects. • TLO 19. Recognize test-first development, where you design tests before writing code and run these tests automatically. • TLO 20. Discuss the three distinct types of testing—component testing, system testing, and release testing • TLO 21. Explain the distinctions between development testing and user testing.
CLO 6. Explain why software evolution is such an important part of software engineering and to describe the challenges of maintaining a large base of software systems, developed over many years.	• TLO 22. Recognize that software systems must adapt and evolve if they are to remain useful and that software change and evolution should be considered as an integral part of software engineering. • TLO 23. Discuss what is meant by legacy systems and why these systems are important to businesses. • TLO 24. Describe how legacy systems can be assessed to decide whether they should be scrapped, maintained, reengineered, or replaced. • TLO 25. Recognize different types of software maintenance and the factors that affect the costs of making changes to legacy software systems.
CLO 7. Discuss software project management and two important management activities, namely, risk management and people management.	• TLO 26. Define the principal tasks of software project managers. • TLO 27. Explain risk management and some of the risks that can arise in software projects. • TLO 28. Discuss factors that influence personal motivation and what these might mean for software project managers. • TLO 29. Recognize key issues that influence team working, such as team composition, organization, and communication.
CLO 8. Demonstrate 21st century skills in all learning activities.	• *Collaboration, Skilled Communication, Knowledge Construction, Self-Regulation, Real-World Problem-Solving, Use of ICT (not part of topic, but integrated in assessments)*

GRADING SYSTEM:

Midterm	
Class Participation / Attendance	- 20%
Enabling Assessments	- 50%
Summative Assessments	- 30%
	100%

Finals	
Class Participation / Attendance	- 20%
Enabling Assessments	- 50%
Summative Assessments	- 30%
	100%

Overall Final Grade = (Midterm + Final) / 2

COURSE POLICIES AND REQUIREMENTS:

1. **Office365 Activation.** Please ensure that your Office365 account is working. Your Office365 account is needed to access both Schoolbook and MS Teams where your asynchronous and synchronous classes will be held.
2. **Enrollment in an E-Class.** You will automatically be enrolled in your e-class which is based on your enrollment data.
3. **Enriched Virtual Blended Learning Model.** This course adopts the enriched virtual blended model. This means that there will be a mix of face-to-face, synchronous, and asynchronous activities. The majority of teaching-learning activities and assessments are undertaken online. The total number of onsite classes shall be 30% of the number of hours allotted for the whole semester.
4. Online Asynchronous Sessions.
    a. **Schoolbook (SB).** Schoolbooks shall be the only platform for asynchronous sessions.
    b. **Modules.** Modules are self-paced learning resources for asynchronous sessions. These can be accessed in Schoolbook.
    c. **References.** Each page section may contain uploaded references. These learning resources may be downloaded.
    d. **Asynchronous Activities.** You are expected to read the modules as soon as they are uploaded. The learning content of the modules complements the online synchronous and face-to-face sessions.
    e. **Asynchronous Engagement.** Your activities in the course can be tracked by your professor. This includes the time you spend in reading the lessons and answering the assessments.
    f. **Schoolbook Forum.** All general concerns about the lessons and assessments in asynchronous sessions must be posted in the Schoolbook Forum. A response shall be made by your teacher within 48 hours.
    g. **Schoolbook Messaging.** This shall be the mode of communication for private and/or confidential communications. A response shall be made by your teacher within 48 hours upon receipt of the same unless it falls on weekends or holidays, which shall be handled promptly the following working day.
5. Onsite / Face-to-face (F2F) Sessions.
    a. **Face-to-face engagement.** Your engagement in face-to-face classes is graded based on your class participation.
    b. **Classroom.** F2F classes shall be held in the classroom indicated in your Certificate of Registration. Should there be changes in the classroom venue, information will be given in advance.

c. **Gospel Reading and Prayer.** Each F2F session shall start with a Gospel reading and prayer. Your teacher may assign you, in advance, to do this.
d. **F2F Meeting Schedule.** The meeting schedule shall follow the time indicated in your official registration. The dates of F2F meetings are identified in the learning plan.
e. **Attendance.** Attendance in F2F meetings is required.
f. **Tardiness.** A student who came 1 minute to 15 minutes after the start of the face-to-face meeting is considered late. Three tardy attendance is equivalent to 1 absence.
g. **Absence.** A student is considered absent 15 minutes after the official class schedule.
h. **Excuse F2F classes.** Students are excused in the F2F classes based on the provisions in the latest version of the Student Handbook.
i. **Uniform.** Wearing of uniform is optional. Civilian attire should follow the policy on dress code as stipulated in the latest version of the Student Handbook.

6. Assessment and Grading System.

a. **Formative assessments.** These are ungraded assessments. These may be considered practice assessments that lead toward achieving outcomes without fear of receiving a failing grade.
b. **Enabling assessments.** These will comprise most of your graded assessments. These are designed to achieve topic learning outcomes, that lead to achieving the course learning outcomes. Only one enabling assessment shall be allowed during the week. Please pay attention to the duration and number of attempts. As a general rule, quiz-type enabling assessments shall be open for only a minimum of 24 hours, while output-based enabling assessments shall be open for at least 6 days.
c. **No. of Attempts.** All enabling assessments, whether given onsite or online, shall have a maximum of 3 attempts only. Summative assessments shall be given a maximum of 2 attempts. d. Summative assessments.

i. There shall be two summative assessments (midterm and final exams) for the entire semester. These are designed to achieve the course learning outcomes.
ii. Online summative assessments shall be uploaded on SB and shall be accessible for a minimum of 1 day for quiz type and a minimum of 6 days for output-based assessments. iii. Summative assessment may be given online or face-to-face.
iv. Output-based summative assessment shall be given to students at least fifteen days prior to the scheduled Summative Exam Week.

e. **Lifeline.** Only students with (1) valid reason as stated in the Student Handbook and IRR, and (2) given their proof of excuse on or before the next synchronous/F2F session, shall be given a lifeline on the enabling and summative assessments.
f. **Rubric.** All online non-quiz or non-discrete types of assessment (essay, dropbox, output-based, etc.) shall have a rubric or criteria for rating the students' tasks. A student may refuse to answer these types of assessments in the absence of a rubric or criteria for grading, and the assessment shall be deemed invalid and shall not be part of the student's grades.
g. **Grading.** All online assessments should be checked and graded by the teacher before the submission of midterm and final grades.
h. **Grading system.** The following shall be the basis for the computation of grades per term for fully online and enriched virtual blended classes (see table above):
i. Enabling Assessments: 50%
ii. Class Participation (including Attendance): 20% iii.
Summative Assessments: 30%
i. **Gradebook.** Students can see the breakdown of grades in their Assessment tab.

7. Self-Care.

a. **Schedule.** There is only one schedule of Self-Care week during the Second Semester SY2022-2023. It is on April 24 to 29. During this week, there shall be no synchronous meetings, F2F classes, new modules, new assessments, and deadlines.
b. **Prerogative.** Students may avail of the self-care program, whether online or onsite, provided by the different units of the University.

8. Copyright and Plagiarism.

a. Using of any illegally obtained software and other technology tool is strictly prohibited.
b. Students are encouraged to use their original photos, videos, and other resources. Otherwise, students can use royalty-free resources or embed the sources in their submissions to avoid copyright infringement and/or plagiarism.
c. Giving of password to Schoolbook and Office 365 is strictly prohibited. Likewise, accessing Schoolbook and Office 365 account other than the students' personal account is also strictly prohibited. Violating students will be reported to the Student Welfare and Formation Office (SWAFO).
d. This subject shall abide by the policies pertaining to intellectual property, copyright, and plagiarism as stipulated in the latest edition of the Student Handbook.
e. Any plagiarized work, whether in part or full, shall mean a grade of 0.0 for the assessment.

9. This course shall abide by any institutional policies that may be released after the approval of this syllabus. Any such policy shall be posted within the e-class at the forums section, news feed. It will also be briefly discussed during the soonest synchronous meeting.

GRADUATE ATTRIBUTES (DESCRIPTORS/INSTITUTIONAL LEARNING OUTCOMES) – PROGRAM LEARNING OUTCOME
MAPPING TABLE FOR BS COMPUTER SCIENCE

Program Learning Outcome	Graduate Attributes/Institutional Learning Outcomes				
	GA1	GA2	GA3	GA4	GA5
1. Apply concepts of computing and mathematics in different domains of computer science.				X	X
2. Identify and analyze problems and define computing requirements appropriate to their solutions.					X
3. Design, develop, test and evaluate various solutions using algorithms for complex computing problems that take full advantage of usability of computer resources.			X	X	X
4. Document computer-based systems by writing effective reports for risk- assessment impact.				X	X
5. Work effectively as an individual or as a member of a team during software development.			X	X	X
6. Communicate effectively with the computing community and non-computer science professionals about computing activities.				X	X
7. Recognize the legal, social, ethical and professional issues involved in the utilization of computer technology and address these issues.	X	X	X		
8. Engage in continuing professional development through performing independent or collaborative research as computing professionals.			X	X	X

NOTE: Provide a check mark on the areas in which the Graduate Attribute (Descriptors/Institutional Learning Outcome) is hit by the program learning outcome (PLO). Kindly refer to the descriptors (institutional learning outcomes) to clearly understand what each attribute refers to or expect from its graduates.

Graduate Attribute (GA)	**(Institutional Learning Outcome)[1]**
1. God-centered	a) Creates an environment where the experience of God is lived and shared b) Practices honesty, fairness, truth and integrity in all aspects of life (personal and professional lives) c) Observes and maintains ethical standards in dealing with the different stakeholders d) Integrates Christian perspectives and values in all undertakings e) Manifests humility and respect in relating with other people
2. Patriotic	a) Manifests a deep sense of nationalism by integrating history, arts, and culture in their daily lives b) Participates responsibly and collaboratively in the discussion and resolution of issues within local, national, and international contexts c) Engages actively in political, social, economic, and cultural transformation for nation building d) Brings pride and honor to the community and the country e) Patronizes locally produced products and promotes them globally
3. Socially Responsive	a) Demonstrates concern and compassion for the plight of the vulnerable and marginalized sectors of society by participating meaningfully in the process of social transformation b) Engages in ecological advocacies as responsible stewards of God's creation c) Continuously works in solidarity with people and institutions to effect liberating action d) Brings forth awareness and deeper understanding of social realities e) Manifests spirit of volunteerism through social actions that improve communities
4. Globally Competitive	a) Takes progressive responsibility for own learning and development b) Promotes critical and creative thinking, self-knowledge and self-mastery c) Is committed to rise above mediocrity d) Shows dedication, commitment and love for work to attain exceptional results e) Exhibits innovativeness and creativity in various contexts
5. Professionally Competent	a) Possesses leadership qualities of **C**ompetence, **H**onesty, **A**ccountability, **R**esponsibility and **T**ransparency (CHART) b) Effectively communicates in various forms of media c) Strives to be at the top of their chosen fields d) Effectively works and collaborates in a multi-disciplinary team e) Adapts to changes in the workplace, local society and global community
