DE LA SALLE UNIVERSITY-DASMARINAS
COLLEGE OF INFORMATION AND COMPUTER STUDIES
COMPUTER SCIENCE DEPARTMENT

COURSE SYLLABUS
Second Semester, SY 2024-2025

COURSE CODE	**:**	S-CSGD324LA
COURSE TITLE	**:**	Immersive Game Development
COURSE TYPE	**:**	Laboratory
COURSE CREDIT	**:**	One Unit
LEARNING MODALITY	**:**	Fully Onsite
PRE-REQUISITES	**:**	None
CO-REQUISITES	**:**	None
PROFESSOR	**:**	Mr. Jan Daenell Bancud
CONSULTATION HOURS	**:**	W/1000-1100/COS100-C
CONTACT INFORMATON	**:**	jnbancud@dlsud.edu.ph 09524869736

VISION

A leading Catholic university that inspires excellence and drives innovation toward a just, peaceful, and sustainable society.

MISSION

To champion the Human and Christian Education of lifelong learners who value history and culture through responsive and inclusive academic, research, and extension programs.

COURSE DESCRIPTION:

This course provides an in-depth exploration of game development using Unity, equipping students with the skills to design, prototype, and build interactive experiences. Students will learn industry-standard software design principles, apply the software development lifecycle in a game development context, and develop structured Game Design Documents (GDDs). Through hands-on projects, they will implement game mechanics, optimize performance, and create engaging 2D and 3D prototypes. The course emphasizes iteration, teamwork, and problem-solving, preparing students to design immersive worlds while upholding ethical and professional standards. By the end of the semester, students will have developed a working game prototype that showcases their creativity and technical expertise.

COURSE LEARNING OUTCOMES:

By the end of this course, students can:

CLO1. describe and identify the core principles of immersive game world design while being capable of explaining foundational game design concepts;

CLO2. demonstrate understanding of game logic, mechanics and gameplay design;

CLO3. breakdown and categorize game ideas while analyzing feasibility of mechanics, illustrate and blueprint a game prototype;

CLO4. determine and evaluate the use of animations, timelines and UI elements for game design;

CLO5. assess and interpret how games can address social and environmental issues, evaluating existing games and creating new games that impact culture, inclusivity, and ethical considerations; and

CLO6. design, develop, and synthesize all learned concepts into a fully functional game prototype.

LEARNING PLAN:

Learning Outcomes for Midterm Period

Course Learning Outcomes	Topic Learning Outcomes
CLO1. Describe and identify the core principles of immersive game world design while being capable of explaining foundational game design concepts.	**TLO1.** Define and differentiate game development and game design, while showcasing the importance of each.
	TLO2. Understand and learn the different tools, languages, approaches to game design, while providing knowledge about different game engines and platforms
CLO2. Demonstrate understanding of game logic, mechanics and gameplay design.	**TLO3.** Write modular, efficient scripts in C# to create objects, use functions and control game mechanics.
	TLO4. Employ concepts, unique ideas and novel mechanics into clear and easily to understand documentation
CLO3. Breakdown and categorize game ideas while analyzing feasibility of mechanics, illustrate and blueprint a game prototype	**TLO5.** Improve gameplay, consider debugging and iterative, continually improving releases from conception to finish.
CLO4. Determine and evaluate the use of animations, timelines and UI elements for game design.	**TLO6.** Determine how to incorporate animations, sounds, music and other elements to improve immersion and feel of games.

Module No and Learning Outcomes	Week	Teaching-Learning Activities / Assessment Strategies	Technology Enabler	Allotted Hours
Module 0	Week 1 Jan 20-25	• Gospel Reading, Reflection, and Prayer • Discussion of Course Syllabus • Presentation of course introduction **Module 0: Course Introduction**	Schoolbook	3
Module 1L CLO2 TLO3	Week 2 Jan27-Feb1	• Gospel Reading, Reflection, and Prayer • Elements of a Unity Script • Writing C# Code **Module 1L - Introduction to C#**	Schoolbook	3
Module 1L CLO2 TLO3	Week 3 Feb 3-8	• Gospel Reading, Reflection, and Prayer • Classes, Objects and Functions • Modular Scripting in C#	Schoolbook	3
Module 2L CLO2 TLO4	Week 4 Feb 10-15	• Gospel Reading, Reflection, and Prayer • How to create a Game Design Document • Enabling Assessment - Lab Activity 1. Game Design Document **Module 2L - Game Development Foundations**	Schoolbook	3

Module 2L CLO2 TLO4	Week 5 Feb 17-22	• Gospel Reading, Reflection, and Prayer • Converting Game Mechanics into Pseudocode	Schoolbook	3
CLO2 TLO4	Week 6 Feb24-Mar1	• Gospel Reading, Reflection, and Prayer • Writing effective and efficient code • Enabling Assessment - Lab Activity 2. Rapid Game Screen Prototype	Schoolbook	3
Module 3L CLO4 TLO6	Week 7 Mar 3-8	• Gospel Reading, Reflection, and Prayer • The Unity Editor Interface • Importing Prefabs and Animations • Enabling Assessment - Lab Activity 3. Implementation of Code and Mechanics **Module 3L - Introduction to the Unity Editor**	Schoolbook	3
Midterm Exam	Week 8 Mar 10-15	• Gospel Reading, Reflection, and Prayer • **Midterm Summative Laboratory Assessment on Module 1L-3L**		3
TOTAL				24

Learning Outcomes for Final Period

Course Learning Outcomes	**Topic Learning Outcomes**

CLO5. Assess and interpret how games can address social and environmental issues, evaluating existing games and creating new games that impact on culture, inclusivity, and ethical considerations.	**TLO7.** Incorporate good storytelling, immersive world building or deep game design elements to highlight social, environmental and economic concerns while presenting different perspectives and takes.
	TLO8. Demonstrate collaboration, teamwork and camaraderie by supporting and evaluating each other's works, providing a sense of unity and fulfillment among peers.
	TLO9. Create a reflective, retrospective analysis of the entire game design and development process for further learning.
CLO6. Design, develop, and synthesize all learned concepts into a fully functional game prototype.	**TLO10.** Develop a solid understanding of how to navigate and use the Unity Editor, as well as how to import and export objects, prefabs and components.
	TLO11. Create and design a working prototype/model of the game loop as well as the mechanics to incorporate.
	TLO12. Design and Export the working game prototype for feedback and analysis

Module No and Learning Outcomes	**Week**	**Teaching-Learning Activities / Assessment Strategies**	**Technology Enabler**	**Allotted Hours**
-	Week 10 Mar24-29	• Gospel Reading, Reflection, and Prayer • **Completion of Missed Assessment** **Sustainability Week**	Schoolbook	3

Module 4L CLO5 TLO8	Week 11 Mar31-Apr5	• Gospel Reading, Reflection, and Prayer • Using Source Control • Collaborative game development • Enabling Assessment - Lab Activity 1. Collaborative Game Development **Module 4L - Team Game Development**	Schoolbook	3
Module 5L CLO6 TLO10 TLO11 TLO12	Week 12 Apr 7-12	• Gospel Reading, Reflection, and Prayer • Designing and building a game prototype • Analyzing and Improvement form feedback • Enabling Assessment - Lab Activity 2. Prototype Development **Module 5L - Game Development Production**	Schoolbook	3
	Week 13 Apr 14-19	***Independent Learning Days (April 14-15)*** ***Holy Week (April 16-19)***		3
	Week 14 Apr 21-26	***Research Week***		3
Module 6L CLO5 TLO9	Week 15 Apr28-May3	• Gospel Reading, Reflection, and Prayer • How to look for bugs • Receiving Feedback from other Developers • Enabling Assessment - Lab Activity 3. Feedback **Module 6L - Game Testing and Feedback**	Schoolbook	3
Module 6L CLO5 TLO9	Week 16 May 5-10	• Gospel Reading, Reflection, and Prayer • Demonstration of Activity	Schoolbook	3

Final Exam	Week 17 May 12-17	• Gospel Reading, Reflection, and Prayer • **Final Term Summative Assessment – Presentation of final output (Game Prototype)**	3
TOTAL			24

RUBRIC FOR EVALUATING THE FINAL PRODUCT:

Criteria	Percentage
Creativity, Uniqueness and Design	25%
Documentation and Presentation	25%
Functionality and Fun	25%
Collaboration and Communication	15%
Group Impact/Feedback	10%

GRADING SYSTEM:

Midterm	%	Final	%
Enabling Assessments	40%	Enabling Assessments	40%
Summative Assessment (Midterm Examination)	60%	Summative Assessment (Final Examination)	60%
	100%		100%

FINAL GRADE = $\frac{\text{Midterm Grade + Final Grade}}{2}$

COURSE POLICIES AND REQUIREMENTS:

1. This course follows the Onsite Learning Mode. All activities will be done in the laboratory classroom and field.

2. Enrollment in an E-Class. The Center for Innovative Learning Programs (CILP) shall enroll you in the e-class. This will be based on the class list provided by the Office of the University Registrar.

3. Laboratory Policies
   a. Students must be honest at all times; cheating and plagiarism in any form will merit a grade of 0.00.
   b. Cellular/Mobile phones should always be in silent mode during class hours; the use of cellular phones is prohibited in class unless special permission is sought. Cellular phones also cannot be used as calculators during examination.
   d. Any complaints against the teacher or against classmates should be properly addressed to the subject teacher for appropriate action. Students may seek the help and guidance of their academic/registration adviser in resolving the issue with the subject teacher when such mediation is needed.

4. Communication and Feedback

a. Online Asynchronous Communication shall happen when the faculty utilizes at least one of the recommended asynchronous communications. The minimum response time for asynchronous communication is 48 hours, excluding Sundays and holidays. All communication platforms must be explicitly indicated in the syllabus. Below are the recommended asynchronous communication platforms:

i. Forum – at the Forum Tab at Schoolbook, students can post their general concerns. The forum is public, and any post can be seen by the class.
ii. Messaging – at Schoolbook. Any private or confidential matters may be messaged through Schoolbook messaging feature.
iii. Email – you may email your professor. (Professor's email will be given during the course orientation)

b. No use of foul, curse, and other bad words, whether in written or verbal. No shouting. No flooding of chat and messages. No selling.

5. Attendance Policy
   a. Attendance Policy for Onsite Classes is scheduled based on the learning plan.
   b. The onsite meeting will only be held at the schedule indicated in the registration form.
   c. Students are required to attend onsite classes, 40% of absence (from onsite classes) for the entire semester means 0.0 final grade.

6. Intellectual Property Policy
   a. Policy and copyright infringement will not be tolerated. Any violation of such will earn students a grade of zero in the assessment.
   b. Using any illegally obtained software is strictly prohibited.
   c. Students are encouraged to use their original photos, videos, and other resources. Otherwise, students can use royalty-free resources or embed the sources in their submissions to avoid copyright infringement and/or plagiarism.
   d. Giving passwords to Schoolbook and Office 365 is strictly prohibited. Likewise, accessing Schoolbook and Office 365 accounts other than the students' personal account is also strictly prohibited. Violating students will be reported to the Student Welfare and Formation Office (SWAFO).

7. Other Policies
   a. Attire - students must wear decent casual or smart-casual attire prescribed by the Student Handbook.
