VISION

A leading Catholic university that inspires excellence and drives innovation toward a just, peaceful, and sustainable society.

MISSION

To champion the Human and Christian Education of lifelong learners who value history and culture through responsive and inclusive academic, research, and extension programs.

COURSE DESCRIPTION:

The purpose of this course is to study fundamentals concept in programming languages and major tools and techniques to implement them. This programming languages are based in declarative and imperative that includes syntax specifications, structured, object-based, parameter passing and functions. The implementation language will be JavaScript that will provide students with deeper understanding in programming concepts and ability to learn the foundation language in Web development like Angular, React JS, Node.JS and lot more.

COURSE LEARNING OUTCOMES:

By the end of this course, students can:

CLO1. explain the language features and paradigms of programming languages;

CLO2. apply knowledge of programming language and its approach;

CLO3. describe the control, data types and execution of programming languages;

CLO4. determine the appropriate ways for given application;

CLO5. apply the programming languages effectively; and

CLO6. engage lifelong learning with new paradigms and updates with programming language.

LEARNING PLAN:

Learning Outcomes for Midterm Period

Course Learning Outcomes	Topic Learning Outcomes	
CLO1: Explain the language features and paradigms of programming languages.	TLO1	Understand the use of Sublime Text. Chrome, Git bash and other Tools
CLO2 : Apply knowledge of programming language and its approach.	TLO2	Remember the historical background of JavaScript
	TLO3	Identify JavaScript terminologies, Keywords and learn the syntax, operators, and language rules JavaScript
CLO3 : Describe the control, data types and execution of programming languages.	TLO4	Understand the different uses of datatypes of JavaScript, different uses of control structures in JavaScript and differentiate operators from each other and use them correctly.

Learning Outcomes for Final Period

Course Learning Outcomes	Topic Learning Outcomes
CLO4 : Determine the appropriate ways for given applications.	TLO5 Learn to manage array elements, objects, and JavaScript Object Notation TLO6 Familiarize themselves with error and exception handling code TLO7 Implement the document object model
CLO5 : Apply the programming languages effectively.	TLO8 Learn to assert a given statement defining some logic construct TLO9 Implement the best practice in coding TLO10 Incorporate polymorphism by overriding and overloading methods
CLO6 : Engage lifelong learning with new paradigms and updates with programming language.	*Collaboration, Skilled Communication, Knowledge Construction, Self-Regulation, Real-World Problem Solving, Use of ICT (not part of topic, but integrated in assessments)*

FINAL GRADE = $\frac{\text{Midterm Grade + Final Grade}}{2}$

COURSE POLICIES AND REQUIREMENTS:

1. This course follows the Traditional Blended Learning Mode. There will be 50% onsite and 50% asynchronous.

2. Enrollment in an E-Class. The Center for Innovative Learning Programs (CILP) shall enroll you in the e-class. This will be based on the class list provided by the Office of the University Registrar and at the portal.

3. Communication and Feedback
    a. Onsite classes shall happen as indicated in the learning plan section of the syllabus. Fifty percent (50%) of the weekly classes is delivered face-to-face while the remaining is asynchronous.
    b. Online Asynchronous Communication shall happen when the faculty utilizes at least one of the recommended asynchronous communications. The minimum response time for asynchronous communication is 48 hours, excluding Sundays and holidays. All communication platforms must be explicitly indicated in the syllabus. Below are the recommended asynchronous communication platforms:
        i. Forum – at the Forum Tab at Schoolbook, students can post their general concerns. The forum is public, and any post can be seen by the class.
        ii. Messaging – at Schoolbook. Any private or confidential matters may be messaged through the Schoolbook messaging feature.
        iii. Email – you may email your professor. (Professor's email will be given during the course orientation)
    c. No use of foul, curse, and other bad words, whether written or verbal. No shouting. No flooding of chat and messages. No selling.

4. Attendance Policy
    a. Attendance Policy for Onsite Classes is scheduled based on the learning plan. A maximum of 20% for class participation/recitation/attendance shall be allotted for the student's grade.
    b. The onsite meeting will only be held at the schedule indicated in the registration form.
    c. Students are required to attend onsite classes, 40% of absence (from onsite classes) for the entire semester means 0.0 final grade.

5. Intellectual Property Policy
    a. Policy and copyright infringement will not be tolerated. Any violation of such will earn students a grade of zero in the assessment.
    b. Using any illegally obtained software is strictly prohibited.
    c. Students are encouraged to use their original photos, videos, and other resources. Otherwise, students can use royalty-free resources or embed the sources in their submissions to avoid copyright infringement and/or plagiarism.
    d. Giving passwords to Schoolbook and Office 365 is strictly prohibited. Likewise, accessing Schoolbook and Office 365 accounts other than the students' personal account is also strictly prohibited. Violating students will be reported to the Student Welfare and Formation Office (SWAFO).

6. Other Policies
    a. Attire - students must wear decent casual or smart-casual attire prescribed by the Student Handbook.
    b. Students must be honest at all times; cheating and plagiarism in any form will merit a grade of 0.00.
    c. Cellular/Mobile phones should always be in silent mode during class hours; the use of cellular phones is prohibited in class unless special permission is sought. Cellular phones cannot also be used as calculators during examinations.
    d. Any complaints against the teacher or against classmates should be properly addressed to the subject teacher for appropriate action. Students may seek the help and guidance of their academic/registration adviser in resolving the issue with the subject teacher when such mediation is needed.
